When the Unthinkable Happens ...

WHAT'S INSIDE MATTERS

Pottorff's **NEW**
Dual-Module
EFJ-937-MD
Miami-Dade
Approved Louver

The EFJ-937-MD 9" dual-module louver features exterior horizontal J-blades for a pleasing appearance and internal vertical blade section for performance. It has been engineered to withstand the extreme loads, debris impact and cyclic fatigue associated with hurricanes.

- ▶ **NEW Miami-Dade listing**
- ▶ **AMCA Certified for Water Penetration, Air Performance and Wind-Driven Rain**
- ▶ **AMCA 540 (Impact Resistant) and 550 (High Velocity Rain Resistant) listed**

5 year
warranty

EFJ-937-MD

Pottorff's 9" deep, dual-module louver, EFJ-937-MD is engineered and tested to withstand the extreme loads, debris impact, and cyclic fatigue associated with the severe weather effects of hurricanes. The exterior side features horizontal J-style blades for a pleasing architectural appearance. The interior features vertical chevron blades which provide superior resistance to wind-driven rain. We also offer an EFJ-937 Non-Miami-Dade Model.

- ▶ **Front module features horizontal J-blades for desired aesthetic appearance**
- ▶ **AMCA 540 (Impact Resistant) listed**
- ▶ **AMCA 550 (High Velocity Rain Resistant) listed**
- ▶ **Florida Building Code approved**

- ▶ **Rear module features vertical chevron blades for superior wind-driven-rain protection**
- ▶ **AMCA Certified for Water Penetration, Air Performance and Wind-Driven Rain**
- ▶ **Available with an optional factory-attached full sleeve. This allows easy installation using retaining angles with no need for anchors to the substrate.**

The EFJ-937-MD is approved for use in Miami-Dade and Broward counties and is listed in the 2017 version of the Florida Building Code. The EFJ-937-MD is an ideal choice for those geographic areas, or anywhere along the Atlantic or Gulf coasts where protection against severe weather is required.
