PROTECTION AT ITS BEST WHEN WEATHER IS AT ITS WORST

The XAV-545 was designed and tested in accordance with ICC 500, FEMA P-361 and FEMA P-320 guidelines for storm shelters and safe rooms. It is a UL Classified Windstorm Rated Assembly with a design pressure of 300 psf.

With this redesign, bird and insect screen is no longer necessary to meet the impact requirements of ICC-500.
