

# ASHBURN CORPORATE DATA CENTER

ASHBURN, VIRGINIA

Architects:	DVA Architects & Interiors, CallisonRTKL
Contractor:	Holder Construction
Pottorff Representative:	Havtech

The Ashburn Corporate Technology Center is the third largest data center in the United States. Located just outside of Washington D.C., this center contains eight co-locations that lease data and cloud storage space to major corporations including Facebook and Microsoft.

Pottorff supplied drainable blade louvers, control dampers and counterbalanced backdraft dampers for Ashburn Corporate Center 6, ACC7, ACC9 and ACC10 buildings. ACC7 and ACC10 were awarded LEED Gold status.

**5**  
year  
warranty

# POTTORFF PRODUCTS SUPPLIED TO THE ACC:

Quality products and excellent customer service are what differentiate Pottorff from the competition. Founded in 1928, we are one of the most respected suppliers of HVAC products in the

industry. Our skilled engineers, in-house testing and adherence to code agency restrictions ensure that our line of Air Control products meet and exceed industry and customer expectations.

Pottorff louvers are tested at our in-house louver laboratory and verified to meet third party standards for your project requirements. Available in standard colors or as a custom color match.

## CD-41/42 Control Dampers

CD-41 (opposed blades) and CD-42 (parallel blades) Control Dampers. These dampers feature economical triple-V blades and a rugged hat channel frame for automatic air control and manual balancing in medium pressure and velocity applications.

## CD-45/46 Control Dampers

CD-45 (opposed blades) and CD-46 (parallel blades) Control Dampers. These dampers feature high performing airfoil blades and a rugged hat channel frame to provide extremely low leakage and exceptional air control in medium to high pressure and velocity applications.

## CBD-150 Backdraft Dampers

This backdraft damper employs counterbalanced gravity operated extruded style blades to restrict reverse airflow and to permit the forward flow of air in the intended direction.

## EFD-645 Drainable Blade Louver

This louver is designed to prevent water penetration by collecting water in frame and blade gutters and channeling it into downspouts and away from airflow paths. AMCA certified for Water Penetration and Air Performance.

## Ashburn Technology Center (Fiber Alley)

Detail shows part of the "Fiber Alley" in Ashburn, Virginia. It is home to some of the largest co-located data centers in the United States. Highlighted in blue are ACC Data Center buildings that feature Pottorff products.

The ACC data centers house computing and networking equipment for firms to allow secure access to large amounts of data.

Overview of the Ashburn Corporate Center Complex.

Building ACC6 is 300,000 square feet and the project was completed in 2014.

Building ACC7 is 446,000 square feet and the project was completed in 2014. ACC7 was awarded LEED Gold Status.

Building ACC9 is 180,000 square feet and was completed in 2017.

Building ACC10 is 130,000 square feet and opened in 2019. This building won the Washington Building Congress Craftsmanship Award, and was awarded LEED Gold Status.
